

## ***Our Story...***

Created by Monks hundreds of years ago as a religious symbol and handed out for performing good deeds, pretzels quickly became a favorite treat around the world. Few places in the world are easily defined by a single food item, Seattle has coffee, New York has pizza, and Philadelphia has pretzels (along with cheese steaks but who's counting). We bristle at the words "junk food" when referring to pretzels because there is nothing junky about our pretzels which are made with only the freshest ingredients every hour. Try them and you'll think our pretzels are so good it's a sin not to eat them.
